TECNOLOGY FOR PLASTIC MATERILAS PROCESSING

Small and versatile heating machine for plastic sheets as polymethylmethacrylate (Plexiglas), polycarbonate, PVC, ABS polystyrene and others.

Available with 2 or 4 wire resistors , with length of 1000 - 2000 mm and fixed opening of the heated area of 1.5 mm., to heat sheets with thickness from 1 to 5 mm.

No cooling system required. Feeding: 220 Volt monophase. Power resistance at low voltage.

PLiS Plus

Only for the 1000mm long model is possible to move n.2 resistors on a bottom chassis with pantograph opening, to heat the material on both sides.
